Student programmers

We are looking for skilled student programmers for our department in Aarhus.

As a student programmer at Cryptomathic, you will be assigned to one of our project teams. You participate in the development work and contribute to solutions that are used by our customers.

Our projects work either to further develop Cryptomathic's own products or with customer-specific solutions that are based on one or more products.

The work mainly takes place in smaller teams and is organized according to agile principles.

About you

You are currently studying to be a computer scientist, civil engineer or similar, and have completed or are close to completing the bachelor's part. You have experience with Java, C# or C++. It is a plus if you have taken courses in cryptography, but it is not a requirement.

You are independent, responsible and good at collaborating with others and being part of a team.

You can put in 12–15 hours a week with us. The work will be organized so that it fits with your studies.

About us

Cryptomathic provides products and systems to customers in most of the world, primarily banks and other financial companies. Cryptomathic products are included in many different security solutions for customers. For example, in areas such as digital signatures (e.g., online banking and legal documents) and key management (e.g., in connection with the issuance and use of payment cards).

Our development department is located on Åboulevarden in Aarhus C. We have approx. 70 employees in Aarhus. In addition to the development department in Aarhus, Cryptomathic has sales offices in Germany, England and the USA, and in total there are approx. 100 employees in Cryptomathic.

Application

Application deadline: 31 May 2023.

Job start: End of August or beginning of September 2023.

Application, CV and diploma transcript is sent to: cryptomathic-job@cryptomathic.com
